```
└── 📁 ai saver
    └── 📁 config
        └── database.php
    └── 📁 database
        └── ai_saver.sql
    └── 📁 js
        └── chat.js
    └── budgets.php
    └── chatbot.php
    └── index.php
    └── login.php
    └── logout.php
    └── register.php
    └── reports.php
    └── setup_database.php
    └── transactions.php
```

1. This is the folder structure demonstrating how you need to save the files in the root folder(ai saver).

2. The root folder(ai saver) must follow the path -> C:\xampp\htdocs\ai saver.

3. You must turn on the Apache and MySQL servers from the xampp control panel.

4. The SQL query written in the C:\xampp\htdocs\ai saver\database\ai_saver.sql, must be pasted in the database.

5. You need to run the login.php file to access the website from starting point.

6. To run the login.php file, use this url -> http://localhost/ai%20saver/login.php
